

## **River Habitat Activity**

***In-stream and stream bank characteristics: A report of findings.***

- 1. Describe characteristics of River Habitat video on the Native Expeditions website on one page for erosion issues along stream bank, color, clarity, stream suspended sediment, meandering, and vegetation characteristics for stream bank stabilization.***
- 2. Do you believe this part of the river has critical issues of erosion?***
- 3. Are there rapids or riffles present?***
- 4. Would this be a good place to sample macroinvertebrates vs. fishing?***
- 5. Do you believe this is the main channel of the river or a distribution channel?***
